"Anaconda really is a bloodline, if you will, of the data science practice for my company. It enables development tools, statistical modelling, and package management, ensuring dependencies among packages with correct updates."

- Python technology lead at the life sciences organization

## ANACONDA.

Anaconda is built to advance AI with open source at scale, giving builders and organizations the confidence to increase productivity, and save time, spend and risk associated with open source. 95% of the Fortune 500 including Panasonic, AmTrust Financial, Booz Allen Hamilton and over 50 million users rely on the value The Anaconda Al Platform delivers through a centralized approach to sourcing, securing, building and deploying AI. With 21 billion downloads and growing, Anaconda has established itself as the gold standard for Python, data science and AI and the enterprise-ready solution of choice for AI innovation.
